If you have any of the items on this want list, please let me know for my records. I am always happy to purchase items for my collection, and have many excellent and rare items (9mmP and other calibers) available for trade. Your help with my research and my collection is greatly appreciated.

I publish a *Guide to 9mm Parabellum Headstamps and Case Types*. Volumes 1-3 are available covering headstamps A through T. The volumes are \$50 each and are about 200 pages. The guide provides large format photographs of headstamps and case types as well as photos of box labels and information on the manufacturer and years of production. These are a key reference for the serious collector. I will be glad to trade these Guides, or other of my numerous publications for cartridges. Check my website at <http://gigconceptsinc.com>.
